DETAILED ACTION

Elections/Restrictions

Claims 53 through 393 continue to stand as being withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on February 2, 2005.

Response to Amendment

The applicant(s) amendment filed on November 13, 2009 has been fully considered and made of record.

Although the examiner disagrees with most of the applicant(s) arguments filed on November 13, 2009, the examiner has reconsidered his position with respect to the prior art, most notably the applied reference to Fujii et al (U.S. Patent 4,637,130). While Fujii does teach a texture, which can be read as the pit, surface layer, or surface materials, of any of the contact tip structures, Fujii is silent as to **when** any of the "textures" are formed relative to when the contact tip structure is formed on the sacrificial substrate. In other words, neither Fujii, nor any of the remaining prior art, disclose:

forming a contact tip structure on a sacrificial substrate;
prior to constructing the contact tip structure, providing a texture in an area of the sacrificial substrate, wherein the contact tip structure is formed on the area of the sacrificial substrate which is formed with the texture;

(emphasis added) as recited specifically in Claim 29.

Accordingly, the rejections centering around Fujii et al have been withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 29 through 52 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification and drawings, as originally filed, do not provide any written description for the claim limitations of "prior to constructing...with the texture" (lines 4-6 of Claim 29), as well as any of the limitations recited in dependent Claims 30 through 32.

The applicant(s) have not pointed out where this new claim is supported, nor does there appear to be a written description for the above claims limitations. *Hyatt v. Dudas*, 492 F.3d 1365, 1370, 83 USPQ2d 1373, 1376 (Fed. Cir. 2007). See MPEP § 2163.04 (I)(B). It is noted that the above claims limitations were not filed originally with the application, but were filed in a later amendment on April 2, 2002.
